

Covenant Christian School Introduces SafeStudents Online Program

SafeStudents Online is pleased to announce that **Covenant Christian School**, a K4-8 Christ-centered school located in Mobile, Alabama, has selected SafeStudents Online to help its parents keep their children safe from some of the threats commonly found on social media.

Starting in February 2019, Covenant Christian will provide the SafeStudents Online program for all parents of grade 5-8 students. Parents will be able to monitor their children's social media activity for inappropriate or potentially dangerous posts and will receive alerts to help them take action when necessary.

SafeStudents Online balances protection with privacy to encourage collaboration and communication between parents and children. The advanced technology helps parents keep their children safe from online threats such as cyberbullying, online predators, and damaged reputations. Parents never need to ask for their children's passwords, and the online activity is monitored privately by parents, with the school having no access to the content.

"While the negative effects of social media on teens are serious, there is no way for parents to keep their teens offline forever. Instead, it's important for parents to help their student prepare for a life in the digital world.

This will help give parents a greater awareness of what their kids are doing by giving them the ability to be aware of their child's digital activity that could be damaging to their lives.

Teaching children how to manage their screen time, what can (and can't) be posted online, the consequences of making mistakes on social media, and how to value offline activities over negative social media habits is now needed by parents more than ever."

- Mr. Jamie Lugo, Assistant Principal

SafeStudents Online is 100% focused on bringing social media protection programs to middle and high schools. Along with our technology partners, we have built a custom solution that balances protection and privacy. Our program allows schools to be proactive, providing parents with a tool that gives them better awareness of their children's social media activity without spying. For more information about SafeStudents Online and how it may benefit your school, please visit www.SafeStudentsOnline.com.
